

AI AGENTS FRAMEWORKS A QUICK GUIDE

n8n

n8n.io

A workflow automation tool that integrates AI with business processes. Seamlessly connect and automate across apps and services.

airtop

airtop.ai

An intelligent browser automation platform powered by APIs and AI agents, designed for seamless interaction with web interfaces.

microsoft/UFO

github.com/microsoft/UFO

A multi-agent framework tailored for Windows OS, enabling seamless UI-based automation and agent collaboration.

uAgent

github.com/FetchAI/.uAgents

A Python-based library for building autonomous AI agents that communicate, coordinate, and act independently.

agentforge.net

A Python framework to create, test, and deploy LLM-powered agents with customizable behaviors and workflows.

SuperAGI

superagi.com

An open-source framework built for developers to create and manage autonomous AI agents with ease and flexibility.

aixplain

aixplain.com

A production-ready platform for building AI agents with reliable outcomes, adaptable behaviors, and scalable deployment.

askmarvin.ai

An AI toolkit designed to create natural language interfaces for seamless human-agent interaction.

gwenflow

github.com/gwenlake/gwenflow

A powerful orchestration framework for building applications using autonomous AI agents and LLMs.

LaVague

lavague.ai

A Large Action Model (LAM) framework designed to build capable AI web agents with broad interactive abilities.

fastagency.ai

A rapid deployment platform for launching multi-agent workflows in production with ease and speed.

smolagents

huggingface.co/docs/smolagents

A lightweight AI agent framework from Hugging Face, built for fast and efficient creation of powerful agents.

github.com/ag2ai/ag2

A framework for orchestrating, optimizing, and automating LLM-powered workflows using multi-agent systems.

QuantaLogic

github.com/quantalogic/quantalogic

A React-based (Reasoning & Action) framework for building intelligent and adaptive AI agents.

mgx.dev

An AI-driven multi-agent framework focused on automating software development and project management tasks.

LiveKit

livekit.ai

A real-time AI agent platform for building voice-enabled applications and audio interactions.

github.com/frdel/agent-zero

A flexible, general-purpose framework for developing fully customizable AI agents.

julep.ai

A framework for building memory-aware AI agents that can recall past interactions and handle complex workflows.

guardrailsai.com

A robust framework for building safe, secure, and trustworthy Generative AI applications with built-in validations.

ELIZA OS

elizaos.ai

A powerful simulation framework for creating, testing, and managing autonomous multi-agent systems.

SIMULAR

similar.ai/articles/agent-s2

An open, modular, and scalable framework designed to build intelligent agents for computer use cases.

haystack.deepset.ai

Haystack is Deepset's open-source NLP framework for building advanced search systems and conversational AI experiences.

crew.ai

A multi-agent framework built for orchestrating agents to collaborate on complex tasks and workflows.

rootflo

flo-ai.rootflo.ai

A flexible platform for building composable, agentic workflows using modular components that scale with your needs.

Vaibhav Aggarwal
